Marco Ramirez, Chris Confer, and the AES Team
are nationally recognized leaders in mathematics
education and they will help teachers...

- develop a comprehensive lesson plan that includes systems designed to master Priority Gaps in the first 30 days.
- learn and apply Tier I and Tier II AES Structures for implementing the lesson plans.
- use scientific research-based instructional strategies that develop students' abilities to use the process standards for learning current year objectives as well as resolving prior year gaps.
- experience the engagement that students feel when given the opportunity for rigorous thinking and reasoning, problem solving, and communicating understandings.
